--As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

U.S. DEPARTMENT OF AGRICULTURE, FOREIGN AGRICULTURAL SERVICE

EXPORT SALES REPORT

Comments on release of August 7, 1975 (based on reports from exporters during the week ending July 27, unless otherwise noted):

SOVIET GRAIN SITUATION: A team of American experts is currently inspecting spring wheat crop conditions in the USSR and a new estimate of total Soviet grain production in 1975/76 will be made following its return to the U.S. next week. Total grain purchases by the USSR for 1975/76 delivery of approximately 14 million metric tons (MT), coupled with current estimates of Soviet production and consumption, indicate that further imports will be needed. However, it is difficult to quantify the likely level of additional Soviet grain purchases since consumption is subject to some adjustment and import requirements will depend in part upon the desired level of stocks.

Wheat: The apparent export commitment (cumulative exports plus outstanding sales) for 1975/76 increased by 807,200 MT. Major increases in commitments were made to the European Community (EC), East Germany, and Japan of 67,100 MT, 127,000 MT, and 95,500 MT, respectively. Commitments to unknown destinations increased by 244,200 MT, and optional origin sales to the USSR climbed 900,000 MT to 2.4 million MT.

Recent large grain purchases by the USSR apparently have thus far not stimulated unusually large forward purchases of U.S. wheat by other foreign countries. As of July 27, outstanding sales to foreign countries, excluding the USSR, are actually 1.3 million MT below outstanding sales at this time last year. Compared with last year, outstanding sales to India are up by about 800,000 MT to 1.8 million MT, and sales to Japan and the EC are moderately higher, but sales to other countries, including Iran and the People's Republic of China, are down by more than an offsetting amount.

Feedgrains: Total corn commitments for 1974/75 increased by 336,500 MT, with increases of 68,800 MT to the EC, 142,400 MT to Japan, and 53,900 MT to Spain being the major changes. For 1975/76 shipment, total corn commitments rose by 958,500 MT, based largely on increases to the EC, Japan, and East Germany of 305,300 MT, 431,500 MT, and 204,900 MT, respectively.

Soybeans: The apparent export commitment for 1974/75 increased by 80,700 MT, primarily on new sales to Denmark, Japan, and Canada. Exports fell to 163,000 MT, well below the weekly average to date. European soybean prices continued to climb during the month and reached \$256 MT (\$6.97 per bu.) by July 29, before declining slightly on July 31.

Soybean Meal: The apparent export commitment for 1974/75 decreased by 64,800 MT as exports totaled 46,300 MT. The annual unadjusted rate of exports decreased to 4.0 million MT, about in line with the current USDA estimate. Cancellations included the EC, Spain, Venezuela, and unidentified destinations. New sales of 12,000 MT to Poland resulted from transfer of an optional origin contract to the U.S.

Soybean/Cottonseed Oil: The apparent export commitment for 1974/75 for these oils showed no significant change. Exports of soybean oil (SBO) and cottonseed oil (CSO) totaled 1,700 MT and 2,800 MT, respectively. The Arab Republic of Egypt accounted for 2,600 MT of CSO. While no CSO sales for delivery in 1975/76 have been reported through July 27, trade sources indicate that Egypt purchased 12,850 MT of U.S. PBSY CSO on July 31, and 7,000 MT of Romanian sunflower oil for delivery during October-November 1975. The Decatur price of crude SBO rose from 23.60¢ per pound on July 1 to 29.35¢ per pound on July 31. The Dutch mill price began the month at 23.95¢ per pound (above the U.S. price) and closed the month at 29.17¢ per pound (below the U.S. price).

Cotton: The week was characterized by a relatively good level of exports for this time of the year, a small net reduction in sales for delivery during the 1974/75 marketing year (ending on July 31), and virtually no new sales for delivery during 1975/76. The low level of new sales reflected the inactivity in world markets where prices were firm on very light demand. Medium staple offers were not in line with high stock levels. Prices for qualities suitable for coarse count yarns, where world stocks are not high, strengthened on news from producing regions indicating reduced production prospects and higher domestic demand.

The outlook for a moderate increase in world cotton consumption beginning in late 1975 or early 1976 should encourage an increase in world trade. However, more than adequate cotton supplies in foreign exporting countries next season, possibly priced below U.S. cotton if current trends continue, could discourage strong improvement in U.S. cotton exports in 1975/76.
